## JoomlaStart is launched

Posted by admin - 2006/04/12 15:25

---

We have launched JoomlaStart tool to give users a faster possibility to install Joomla!

Installing Joomla has never been easier, you upload 1 file, the Joomla.Smart.php which we provide and from there all it's done by the machine:), no need to worry about uploading files or corrupted installs!

You can even select which version of Joomla to install and where you want it installed!

What do you think? Have you tried it yet?
