
what about this ?

Posted by Mohammed - 2006/04/24 12:14

Hello world ,

I'm really impressed by this tool , a " thank you " should be said at first !

well , I'm wondering if it's available to repacking Joomla version in case of making changes . I'm the Arabic language coordinator and I'd like to repack the tool with translation files . Besides , if you're looking forward to translating this tool , count me in .

Regards Mohammed . :)

Hey there! We have a tool specially designed for this called JoomlaCloner, http://www.joomlaplug.com/Tools/JoomlaCloner/JoomlaCloner_-_your_site_backup_and_restore_utility.html, it will clone your custom Joomla install and you can move it anywhere on the internet, unpack, configure and done:)

Let me know if you need further guidance! Regards, Ovidiu

nah , I'm speaking about " Joomla Desktop Installer " .

currently , it contains the stable latest release of Joomla 1.0.8 .

I want to introduce this tool to my Arabic community .

This requires :

- 1) to be translated , i mean the tool
- 2) a localized version of Joomla be there rather than the standard version

I hope you got my point .

cheers !

Hey there! Yes, a repacking is possible, but this will require custom work!

Please contact me on admin@joomlaplug.com to talk more! Regards, Ovidiu
