## checking all option?

Posted by gg1965 - 2006/10/11 21:53

---

Hi all,

I don't think i am able to select all the components and modules (in the structure section). I don't want to backup all of my components and modules and it takes some time to tick them all (to say that i don't want to back them all up). so is there anyway that i can check all of the components/modules in one go? if not, can you add this functionality into the next release.

Thanks

graham

We will look into adding this as a new feature for the next release!

Regards, Ovidiu
