
admin inlog and password?

Posted by mirjam - 2007/04/16 13:09

After I installed Joomla with the desktop utility, where can I find my password to log in in the admin part?

=====

Hi there! When installing Joomla, at the last step, you have an option to create an admin password or a random one is created by default! If you don't know the password, i suggest you go in the 'Lost password' section from the frontend and try to retrieve a new password!

If you still have problems, I suggest you reinstall Joomla and pay attention to all the steps so you create your password correctly!

Regards, Ovidiu
