
Can I add auto-login?

Posted by mlewis - 2008/03/09 20:11

Any way of passing the user name/password to roundcube so that users don't have to go through a secondary login?

I'm guessing this has been asked a 100 times :).

Mike

The user and pass of the roundcube access area are connected to the IMAP server and not the Joomla database, storing those details in the database would be unsecure, leaving the email accounts password unprotected! So while it can be done through some modifications, i would not advise it!

Hi Ovidiu

Accepting the risks, i'd still like Joomla to authenticate RC. Passwords are mirrored. Any guidance please?

Thanks
Jody
