
JCron 1.0 beta launched

Posted by admin - 2006/06/20 15:26

JCron Scheduler - Joomla/Mambo component 1.0 has been launched! This is a component designed for Cron Jobs Management and Scheduling through a Joomla/Mambo website!

It's purpose is to simulate cron jobs through Joomla front end interface at preset periods of time for users who either don't have access to the server crontab or don't want to use it for any purpose!

For a demo please check our demo area <http://demo.joomlaplug.com>, and login to the backend!

For the Forge page please go here http://forge.joomla.org/sf/projects/jcron_scheduler

To Download JCron Scheduler please go here and get the latest version http://forge.joomla.org/sf/frs/do/viewSummary/projects.jcron_scheduler/frs

Please post on this Forum any suggestions or support questions!

Regards, JoomlaPlug.com Team

Dear all..

I need to download JCron Task scheduler, but I can not download it from either these links :

http://forge.joomla.org/sf/frs/do/viewSummary/projects.jcron_scheduler/frs

http://joomlancode.org/gf/project/jcron_scheduler

Could anyone help me to tell me where I can download this component? Thank you
