
Joomla start

Posted by lukedunstanuk - 2008/06/11 13:28

I have just installed Joomla Start and I encountered the following error.

JoomlaPlug Automatic Installer!
Install Joomla software on the fly!!!
Package succesfully downloaded to /kunden/homepages/1/d99952222/htdocs/wsc99952230/Joomla_1.5.2-Stable-Full_Package.zip

Connected to idtraining.com, for user u36232638, starting transfer...
Error : PCLZIP_ERR_BAD_FORMAT (-10) : Unable to find End of Central Dir Record signature

Does anyone know what this means? and how can I get around the problem?

Any help would be much appreciated.

Many thanks

Luke

You seem to have a download issue of the package, i suggest you download the Joomla 1.5.2 package manually to your site, then use Joomla.Start to extract it, you can select that option from the second drop-down checkbox on your screen

Regards, Ovidiu

Thank you very much for your advise. I'm now experiencing a different problem. When I hit the Stat Install button, I, getting a 'Server Not Found Error page' the URL is as follows

http://joomla.start.php/?task=step1&output_path=%2Fkunden%2Fhomepages%2F1%2Fd99952222%2Fhtdocs%2Fwsc99952230&output_url=http%3A%2F%2Fwww.idtraining.com&ver=1&install_mode=2&ver_local=%2Fkunden%2Fhomepages%2F1%2Fd99952222%2Fhtdocs%2Fwsc99952230%2FJoomla_1.0.15-Stable-Full_Package.zip&transfer_mode=2&ftp_server=idtraining.com&ftp_user=u36232638&ftp_pass=QKM4wbJm&ftp_path=%2Fkunden%2Fhomepages%2F1%2Fd99952222%2Fhtdocs%2Fwsc99952230&submit=Start+install

Is there a problem with the server or have I done something wrong?

Any help on the matter would be great.

Many thanks

Luke

Try and locate line 134 from the Joomla.Start.php file
and replace the code
