
internet explorer error

Posted by schiraly - 2008/06/24 18:27

I've been installed Joomla 1.0.15 and RoundCube v0.1 rc1 beta.
If I browse my website (<http://ugyvedlevelhu.web.maxer.hu/>) and the roundcube with Firefox, it works fine, but with Internet Explorer it step over and display an HTTP404 error.

Please help, what can I do?

It seems to work ok here, if you open that roundcube page directly(
http://ugyvedlevelhu.web.maxer.hu/index.php?option=com_roundcube&Itemid=2) and not through the frontpage frame, do you get the same error?

If I use Internet Explorer, then I got the same error.
I try it from an another pc, do not work with ie, but with Firefox ok.

If you open this link, there is no problem?

Do you have a firewall that could be blocking the frame to roundcube software you are using?

No I don't have.

I try it with an another pc:
The iframe work, but the direct link didn't.

Hi!

I try it on 4 other pc, all pc have another internet connection, without Firewall.

Always the same.

I record it, could you see it:

http://www.ugyvedlevel.hu/roundcube/roundcube_ie.html

(I've use the last 1.1 version)

thanks!

Csaba

I am able to access this link from here in both browser http://ugyvedlevel.hu/index.php?option=com_roundcube&Itemid=3 so it must be something different related to either your host or your connection, the software runs properly from here
