
Jcron /XCloner

Posted by gspj - 2008/10/20 06:30

Hi Ovidiu,

i have XCloner and JCron installed.

I want to backup database and send it per Email.
But the Mail i get is empty. No database was send.

Did you enabled the database logs in your JCron configuration? If so, do you have any cron output?

Also, what is the cron command you are using for running the automated backup? Ovidiu

Yes, i enabled database logs.

Message:
JCron Daemon

Thats all

allow_url_fopen is set to "On" !

Task Type: Web Address fopen()

Command to Run: http://www.mysite.com/administrator/components/com_xcloner/configs/backupcron.php

backupcron.php exist in that place.

Thanks
Gisela

The correct cron command is

http://www.mysite.com/administrator/components/com_xcloner/cloner.cron.php?config=backupcron.php

Re:Jcron /XCloner

Posted by gspj - 2008/10/20 09:34

Now I have this message:

JCron Daemon

Unable to open http://www.mysite.com/administrator/components/com_xcloner/cloner.cron.php?config=backupcron.php

LOCAL CRON DEBUG:

```
Working on cron schedule: * * * * *
Got day 1 for START of 1, 2008
Cron was due to run earlier this year
Cron has already been due to run this month (10)
Getting days array
Getting days for 10
Days in 10, 2008: 31
Array: 0=>1, 1=>2, 2=>3, 3=>4, 4=>5, 5=>6, 6=>7, 7=>8, 8=>9, 9=>10, 10=>11, 11=>12, 12=>13, 13=>14, 14=>15,
15=>16, 16=>17, 17=>18, 18=>19, 19=>20, 20=>21, 21=>22, 22=>23, 23=>24, 24=>25, 25=>26, 26=>27, 27=>28,
28=>29, 29=>30, 30=>31,
Cron has already been due to run today

I presume mysite.com is replaced with an actual url in your cron command? If it still fails, i suggest you switch over to the ssh command, and use this format:

```
"php /server_path_to/administrator/components/com_xcloner/cloner.cron.php backupcron.php"
```

Hope it helps! Ovidiu

Re:Jcron /XCloner

Hi Ovidiu,
yes, it is an actual url. But now my Backup-Mail contains this message (without any attachment):

JCron Daemon

```
Array
## ecec/php
/homepages/21/1234567890/htdocs/SNV/myside//administrator/administrator/components/com_xcloner/cloner.cron.php
backupcron.php) ##
```

LOCAL CRON DEBUG:

```
Working on cron schedule: 0 19 * * *
Got day 1 for START of 1, 2008
Cron was due to run earlier this year
Cron has already been due to run this month (10)
Getting days array
Getting days for 10
Days in 10, 2008: 31
```

Array: 0=>1, 1=>2, 2=>3, 3=>4, 4=>5, 5=>6, 6=>7, 7=>8, 8=>9, 9=>10, 10=>11, 11=>12, 12=>13, 13=>14, 14=>15, 15=>16, 16=>17, 17=>18, 18=>19, 19=>20, 20=>21, 21=>22, 22=>23, 23=>24, 24=>25, 25=>26, 26=>27, 27=>28, 28=>29, 29=>30, 30=>31,
Cron has already been due to run today
Array: 0=>0,
LAST RAN: 19:0 on 20/10/2008
Parsing 0 19 * * * taken 0.001146 seconds

I don't set this signs : ##
It is a blank between

My Joomla Version is 1.5.7
And this is the backupcron.php

In Configuration ssh command is set

You should open a support ticket if you like and send us your Joomla admin details, i am unable to figure what the issue is from the provided details

Ovidiu

Re:Jcron /XCloner

Posted by gspj - 2008/10/21 04:45

o.k. I opend a ticket called JCron Settings

Re:Jcron /XCloner

Posted by admin - 2008/10/21 11:37

The issue was fixed by fixing the cron command value

Ovidiu
