
\ "Enable Cron Job\" doesn't work

Posted by barthle - 2008/01/13 03:46

Thanks for prompt response for my previous post..

"Enable Cron run" doesn't seem to be working..I press it and it doesn't turn to "disable cron run"

where should i enter this code?

in wat template? any site template use?

Hi there! You need to make the template index.php file writeable, and also the template directory(the one you have currently setup in your Joomla front templates) in order for that button to work, else you will need to insert the code manually inside the template you have in use currently!

Hope it helps! Ovidiu

Thank you very much for quick response..

Now I can buy Cloner with apiece of mind..

Jcron works like a charm now..Very very useful tool indeed, especialy with Feed Gator..
