
jpopup and autoclose

Posted by mooler - 2009/04/01 03:48

Hello great mambot!

Been trying it for a week now and it looks promising. One thing I can not figure out due to beeing week in the scripting area. How do I make it autoclose in, let's say 4 seconds? Where do i place a window.close statement?

Regards Niklas

If you open the jpopup.php plugin file, you will find the javascript code listed in the

\$GLOBALS =
