
Where shall I add the code?

Posted by shin - 2009/04/22 16:42

It tells me that I have to add the following code manually.

Where do I need to add to?
At the top or after body tag??

Please advise me.
Thanks in advance.

I think you can add that anywhere in your index.php template file as long as you don't mess the existing php code, i think at the end of the file should be ok
