
My Cron Jobs don't execute!

Posted by mango10 - 2009/06/21 09:35

Hi! I'm really desperated! I read all the posts in the forum but I really cannot get my cron jobs to start!

I made a script (send.php) with just this content:

```
alert('test');
```

Then I made a Cron Job:

Task Type: Web Address fopen() (allow_url_fopen is ON)

Command to Run: http://XXX/XXX/send.php (I'm sure the address is correct)

Unix Crontab: ***** (Later I want to have it every two weeks, but for testing I took every minute)

I have this log text:

```
OUT is(GET /XXXX/php/php.exe /XXXX/send.php HTTP/1.1
```

```
Host:
```

```
Connection: Close
```

```
)HTTP/1.1 404 Not Found
```

```
Date: Sun, 21 Jun 2009 06:22:41 GMT
```

```
Server: Apache/2.2.4 (Win32) DAV/2 mod_ssl/2.2.4 OpenSSL/0.9.8e mod_autoindex_color PHP/5.2.3
```

```
Vary: accept-language,accept-charset
```

```
Accept-Ranges: bytes
```

```
Connection: close
```

```
Content-Type: text/html; charset=iso-8859-1
```

```
Content-Language: en
```

```
Expires: Sun, 21 Jun 2009 06:22:41 GMT
```

I want to add two facts:

1. the script works, when I type the page in the address line
2. YES, I have frontside activities

=====

Re:My Cron Jobs don\'t execute!

Posted by mango10 - 2009/06/21 09:48

And I have CRON RUN enabled!!!

=====

Posted by mango10 - 2009/06/21 09:52

ok please forget the log text, there is no possibility to delete it. I copied a wrong log text because at the beginning I spelled the address in a wrong way!

At the moment, there is NO log text. But Last Run time changes.

When I get enable mail-log I get this message:

Error (php_network_getaddresses: getaddrinfo failed: Name or service not known) - (0)
