
cannot backup correctly

Posted by surfkid2060 - 2009/12/11 11:24

Somehow I can not backup correctly. and I have done two sites without problem. But when I am doing this one. I am running into the following problem.

Cloner Manager - www.asiabet888.com

Fatal error: Allowed memory size of 67108864 bytes exhausted (tried to allocate 15886812 bytes) in /home/yanwebn1/public_html/asiabet888.com/ag/administrator/includes/pcl/pclzip.lib.php on line 2392

Please help me.

Thanks

I would advise switching the backup type to TAR or increasing the php.ini memory_limit value to a larger value like 128M

Regards, Ovidiu
