## Does Jcron work with Joomlacloner?

Posted by zoomlanski - 2010/01/28 20:40

---

Will Jcron ensure automatic backups using joomlacloner?  
or viceversa - does joomlacloner have an auto-backup feature?

Pls move this to the proper forum if this is not suitable.

Thanks

Tim

Hi there! JoomlaCloner does not have the ability to create scheduled automated backups, it only provides the cron command which you can input to the JCron software, so yes, you can use JCron and the JoomlaCloner cron command to generate scheduled backups on your site
