
JPopup J 1.5.15 always in the same position

Posted by jarecki74 - 2010/02/19 07:45

Hi , i install jpopup1.2.0 in my J 1.5.15 with template Simplex.

After enable Jpopup in article the window open always in the same position.

Parameters jpopup_centered or jpopup_left dont work

Please help

Hi there! Have you tried to manually apply the parameters in the jpopup code? If so, what is the code you used? Ovidiu

yes, add manualy code in my article

```
jpopup jpopup_centered=1 }test{/jpopup
```

dont work

Try adding the jpopup_top and jpopup_left properties to specify the exact size on the page, the centered option is a relative option to the whole site size

Ovidiu
