
Remove Link

Posted by iwd - 2010/04/07 08:37

Good Day,

great Plugin.

Now, one asks still remains to me unsettled:

How do I remove the Link "JPopup"?

I have integrated this Plugin on one of our customer Website. There it is not allowed to use advertisement in the form of links!

I have already looked in jpopup.php and have deleted this Link from small-tag. unfortunately, this is left still beside ' Close! ' available.

How or where do I remove the JPopup-Link?

I am glad at solution suggestions!

Dear greeting

ps: sorry for my english - is not my motherlanguage.
