## installing on remote server

Posted by ly\_designer - 2006/09/25 13:18

---

I just wanna ask if it is possible to install Joomla on a remote server without installing the sample data.

=====

I don't think at the moment, the curent Joomla version 1.0.11 supports this option!  
Maybe add this request in the wishlist for the next version!

Regards, Ovidiu
